script.js

```
1  var firstName = 'John';
2  console.log(firstName);
3
4  var lastName = 'Smith';
5  var age = 28;
6
7  var fullAge = true;
8  console.log(fullAge);
9
10 var job;
11 console.log(job);
12
13 job = 'Teacher';
14 console.log(job);
```

## 11 Problems

## ▼ JSLint (1)

2 ⚠ 'console' was used before it was defined. console.log(firstName);

## ▼ ESLint (10)

2 ❌ ERROR: Unexpected console statement. [no-console] console.log(firstName);

2 ❌ ERROR: 'console' is not defined. [no-undef] console.log(firstName);

4 ❌ ERROR: 'lastName' is assigned a value but never used. [no-unused-vars] var lastName = 'Smith';
